

# kiwifruit seed oil

Kiwifruit Seed Oil is extracted from the seeds of *Actinidia chinensis*. It contains more than 60% Alpha Linolenic Acid (Omega 3, ALA) which is an Essential Fatty Acid that our body is unable to produce and should therefore be present in our diet for the maintenance of good health.

Kiwifruit Seed Oil is ideally suited for skin and hair care products as the high concentration of ALA helps to maintain moisture. It is a classic anti-ageing product and an important ingredient in dermatitis formulations. It combines with protein and cholesterol to form living membranes that hold the body cells together. Kiwifruit Seed Oil provides a natural source of energy and helps to maintain resilience and lubrication of all cells.

## TYPICAL KIWIFRUIT SEED OIL FATTY ACID PROFILE

The 'Typical Fatty Acid Profile' shown above represents the major fatty acids only and excludes other minor components. Please note the data for this product will vary across different batches and seasonal harvests.
